Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hellenbrand et al (5,096,596; Abstract; 22, 24, 26, 36, 63, 64, 65, 72 & 78 in Fig. 1; col. 2, line 45 through col. 3, line 9 and line 56 through col. 4, line 37).

Hellenbrand et al disclose an aeration control apparatus for water filtration system for removing contaminants from well comprising an aeration tank (24) having a water inlet (22), a water outlet (40), a diffuser (26), a pick-up tube (36), a bleed-off tube (74), a drain tube (70), a source of compressed gas (86), a first valve (78) connecting the source of compressed gas, the second valve (72) for opening the flow passage between the source of compressed gas and the aeration tank, a third valve (64)

operated by the opening of the second valve to connect the interior of the aeration tank, a timer (col. 3, line 65 through col. 4, line 2) is a controller controlling the flow of water and air through the system by automatically adjusting the positions of valves (72, 78 and 64), a bias member (65) positioned between the valve piston and valve stem to bias the valve stem into engagement with the valve piston. It would have been obvious to a person having ordinary skill in the art at the time the invention was made to provide a controller for the aeration tank as taught by Hellenbrand et al to provide an improved apparatus for removing contaminants and undesirable odors found in well water.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- McLean (3,649,532) discloses a method of treating water.
- Kreusch et al (4,534,867) disclose a system for removing iron and other substances from potable water.
- Ohira et al (5,945,004) disclose an apparatus for treating waste liquids.
